

Exercise 5 - Dynamic dates

Objective

By the end of this exercise, you will be able to set Tosca to automatically enter dynamic dates in the "Payment info" Credit card TestStep.

Why is this important?

TestCases will be run repeatedly over long periods of time. Setting dynamic dates means there is less maintenance due to checking/amending dates.

Instructions

1. Duplicate TestCaseFolder "**4b Random Values**" and name it "**5 Dynamic Dates**".

Within the TestStep "**Payment information Credit Card**" enter the correct syntax to:

2.
 - Generate a dynamic date in the **Expiration date | Month** field. The date should be **plus 4 months**, displayed as only a **2-digit month**
 - Generate a dynamic date in the **Expiration date | Year** field. The date should be **plus 3 years**, displayed as only a **4-digit year**

Hints

- » Pay close attention to closing any bracket that you open.
